

## Tenor Index

### Introduction

The government securities market is considered as the backbone of fixed income securities market and is the prime funding avenue for the government. It serves as a benchmark for portfolio management, an indicator of market performance and development, and also forms the basis for derivative products like options and futures. The price to yield sensitivity is different for each bond. In order to capture such non-uniform yield impact on various maturity buckets all outstanding securities are divided into 5 buckets based on their residual maturities.

### BOND INCLUSION RULES

**Data:** All outstanding dated government securities classified based on their residual maturity

**Issuer:** Central Government

**Price:** Volume weighted average price (VWAP) or model price when there are no trades

**Tenor:** Minimum tenor is 1.5 years (Residual maturity on the index resetting date is considered)

**Base Date:** December 31, 2003

**Base Value:** 1000

**Weighting:** Market
