BACKGROUND FOR CLS REGULATIONS

Continuous Linked Settlement (“CLS”), went live on 9th September 2002. CLS essentially is a global settlement system that allows a significant portion of the Foreign Exchange transactions across the world to be settled on a payment vs payment basis, thereby eliminating Settlement risk. CLS settlement is not a guaranteed Settlement and it only ensures that the Settlement happens on a payment versus payment (“PVP”) basis.

The CLS Bank works on a tiered membership, with major international banks operating as direct “Settlement Members” of CLS Bank. These Settlement Members can settle both their own deals, and also through third party services settle deals offered by their constituents (collectively “third parties”). These third party arrangements may be provided by a Settlement Member either through its own arrangements or through the use of Additional Submission Locations. The CLS Bank does not become directly involved in these arrangements.

The Bank currently undertakes to settle transactions in 18 Eligible CLS Currencies, which are Australian Dollar, Canadian Dollar, Danish Krone, Euro, Hong Kong Dollar, Japanese Yen, Korean Won, New Zealand Dollar, Singapore Dollar, Swedish Krona, South African Rand, Swiss Franc, UK Pound Sterling, Norwegian Krone, US Dollar, Israeli Shekel, Mexican Peso and Hungarian Forint. New currencies may be added and notified by CLS Bank.

Clearing Corporation of India Limited (“CCIL”) facilitates Settlement of interbank Cross Currency Deals through CLS Bank by availing the third party services of a Settlement member UBS Switzerland AG hereinafter referred to as Settlement Bank. CCIL has the right to change the Settlement Bank at its own discretion subject to such contractual terms that CCIL may have agreed with the Settlement Bank, after due notification to its members.

CCIL aggregates Trades reported by all member banks, enabling Members to collectively enjoy the benefits of cross currency Settlement through CLS Bank and to avail the benefits arising out of advanced product capabilities, economies of scale due to volume aggregation and simplified processing.
